El humo de incendios forestales y la salud

El humo es un contaminante del aire

Partículas en su mayor parte, pero también:

NO_x CO Hidrocarburos

Use el sentido común para proteger la salud

Limite el tiempo en exteriores y evite el ejercicio al aire libre

Las personas con problemas cardíacos o pulmonares deben ser especialmente cuidadosas.

Llame a su doctor si tiene síntomas: tos, tos sibilante, dolor de pecho o náuseas

Manténgase hidratado y duerma lo suficiente

Mantenga cerradas las ventanas, a menos que haga mucho calor

Haga funcionar el aire acondicionado con la entrada de aire fresco cerrada y el filtro limpio.

Apague el ventilador de toda la casa

Evite el contacto de la piel con las cenizas

No remueva las cenizas

Los incendios dentro o fuera del condado pueden enviar humo y cenizas a nuestro aire

Sin embargo, las columnas de humo visibles no siempre significan que la calidad del aire

Stop smoking. Roll your own.3. Don't use e-cigarettes unless they can be recycled? Drink your ass. The city of San Francisco spends about \$7.5 million a year cleaning cigarette butts, and is far from the municipality that deals with such waste. ""The last remaining acceptable form of trash", says Novotny. The automatic is so automatic. Cigarette filters are made of a plastic called cellulose acetate. He pointed out documents showing that the r.j. The Reynolds tobacco company was exploring biodegradable filters until the 1970s, but cellulose acetate is still the standard today. "On the regulatory side, we haven't been able to find a way to deal with this." The effects of e-cigarette waste on the environment are only beginning to be studied. They also routinely enter waterways, and eventually ocean.zipf said that cigarette mattresses have long been at or near the top of the list of items her organization finds during beach cleanups. "Let's take environmental impact seriously." There have been some steps to address the plastic hazards posed by cigarettes. When they are released into the environment, they dump not only plastic, but also nicotine, heavy metals, and many other chemicals that have been absorbed in the surrounding environment. A recent study found that cigarette butts inhibit plant growth. "People are more likely to pick up their dog poop than cigarette butts. Novotny proposes a radical solution: ban cigarette butts altogether. Filters, he said, has been shown to improve health outcomes. They may even be making the problem worse because they make them smoke a less hard and gives you the feeling that they are doing less damage. This year in New Jersey, a law came into effect that restricts smoking and vaping in public parks and on beaches. As the prevalence of electronic cigarettes has grown, so it has the need to get rid of waste. . Learn what you can do to reduce your own unique use plastic, and take your commitment. Billions of cigarette filters, also known as asses or finished, are left further, only an estimated third of which makes it the garbage. The plastic and the circuit, all went directly to the trash, or the street. The use of electronic cigarettes has skyrocketed. But, slowly, the impacts on smoking health remained clear. In the DÅ © each of 1930, scientists began to make connections between cigarettes and public health risks. Å ē ~ "We are committed to responsible administration and environmental sustainability," he says in an email. In 1957, the General Surgeon officially declared a causal link between smoking and lung cancer. The Billions who remain in the water are dangerous for marine animals, which can eat them, he said. "" It looks a lot more like a snack of food on a sea surface," says Zipf. The problem of contamination has only worsened in the last years, since electronic cigarettes have become more popular, He said, because those who are also made in a large part of plastic. "It is becoming so widespread," says Zipf, using electronic cigarettes and accompanying them. Plastic waste.
